

# Investment Product application pack

(Portfolio to be held through an Investment Product)

BROOKS MACDONALD

This is an Application Pack for the Brooks Macdonald International Bespoke Portfolio Service (“International BPS”) and International Managed Portfolio Service (“International MPS”) and single strategy portfolios. Collectively they will be referred to as “Investment Services” throughout this document.

This Application Pack is to be used when opening one individual portfolio or one joint portfolio for an Investment Product such as an insurance bond, investment bond, QROPs, personal retirement structure or other investment account wrapper, where the investment services are to be held within that Investment Product.

In order to open portfolios with different investment strategies, a separate Application Pack must be completed.

Individuals should understand that the legal owner of assets held within the account with us is likely to be the Product Provider, and it is the Product Provider that we will treat as our client.

### Fixed Interest - (£)

A low-risk portfolio that is structured to preserve and enhance capital through investment in fixed interest assets. The portfolio will be fully invested in a range of fixed income securities, encompassing investment grade, emerging market and high-yield bonds. Equity exposure will be 0%, with any non-fixed interest exposure limited to cash. The recommended investment time frame for this strategy is in excess of three years.

### Defensive - (£)

A low-risk, defensive portfolio structured to provide wealth preservation and returns in excess of cash. The majority of investments will be in stable assets, such as cash and fixed interest securities, with some limited exposure to growth assets, such as equity and property. Equity exposure is expected to range between 10-30%. The recommended investment time frame for this strategy is in excess of three years. Long-term returns are targeted to beat inflation.

### Cautious Balanced - (£/\$/€)

A low-to-medium risk, cautious portfolio structured to provide a large degree of capital protection whilst providing an element of capital growth over the medium-to-long term. Capital growth investments will be made in a combination of stable and growth assets. Equity exposure is expected to range between 30-55%. The recommended investment time frame for this strategy is in excess of five years. Long-term returns are targeted to exceed inflation by 2% per annum.

### Balanced - (£/\$/€)

A medium risk, balanced portfolio structured to provide some capital growth, without full equity market volatility. Investments will be weighted towards growth assets, such as equities and property, with a lower weighting to stable investments such as fixed interest securities. Equity exposure is expected to range between 55-75%. The recommended investment time frame for this strategy is in excess of five years. Long-term returns are targeted to exceed inflation by 3% per annum.

### Growth - (£/\$/€)

A medium-to-high risk, capital growth orientated portfolio structured to provide high levels of participation in growth assets, with associated high levels of equity market risk. The majority of investments will be in growth assets, such as equities, property and other alternative asset classes of investment, with smaller allocations to stable investments such as fixed interest securities. Equity exposure is expected to range between 75-95%. The recommended investment time frame for this strategy is in excess of five years. Long-term returns are targeted to exceed inflation by 4% per annum.

### High Growth - (£)

A higher risk, capital growth orientated portfolio providing full, diversified exposure to equity markets, with associated high levels of equity market risk. Equity exposure is expected to range between 80-100%, with any non-equity exposure limited to cash. The recommended investment time frame for this strategy is in excess of five years. Long-term returns are targeted to exceed inflation by 5% per annum.

## Single strategy portfolios

### Corporate Bond Strategy (minimum investment £1,000,000, \$1,500,000, €1,500,000)

A low-medium risk, fixed income portfolio structured to provide a balance between security, liquidity and income through investment into corporate bonds. The portfolio invests largely in investment grade corporate debt, providing a well-balanced and diversified portfolio of corporate bonds that are typically rated single-A and triple-B. The portfolio aims to provide positive total returns, and offers the option of either taking or reinvesting income.

### Direct Equity Strategy (minimum investment £250,000, \$500,000, €500,000)

A high risk, direct equity portfolio that invests in UK, US and European equities, providing a well-balanced and diversified portfolio of equities that are typically of larger market capitalisation companies. This strategy is particularly useful for investors that require lower volatility, medium to long term equity investment and/or seek some inflation protection as a key component of their overall investment strategy.

### Strategic Income (minimum investment £1,000,000, \$1,500,000, €1,500,000)

The strategy invests in a combination of corporate bonds and direct equities in order to produce an attractive initial yield together with growth in capital and income over the medium-to-long term. The strategy aims to provide a well-diversified portfolio by sector and issuer, of largely investment grade bonds and large well capitalised companies having resilient and growing earnings.

### Bond Plus Strategy (RESTRICTED) (minimum investment £100,000)

Our Bond Plus Strategy invests largely in investment grade bonds, providing stable capital returns, a strong flow of regular income and the ability to significantly tailor the risk profile of the portfolio. The portfolio will additionally invest in other fixed income instruments, such as high yield corporate bonds and emerging market debt, based on our expectations for these markets and the business cycle. The portfolio can also invest in equities via managed funds and/or exchange-traded funds. Similarly the portfolio will invest in a number of hedge funds and/or alternative managers with the aim to achieve returns that are uncorrelated to traditional markets.
